DETAILED ACTION

This Office action is responsive to communication received 01/23/2004 – application papers filed; priority papers received, IDS submitted.

Claims 1-8 are pending.

Following is an action on the MERITS:

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 7 and 8 are rejected under 35 U.S.C. 102(e) as being anticipated by Calboreanu. As to claims 1 and 8, note inner and outer layers (22, 24). These layers are opposed one another and are separated by a gap, the gap in this case being filled with a portion of the club head shell. The outer and inner plates are partially bonded to one another in the sense that the outer and inner plates are indirectly connected via the shell portion of the head. Note the portions at the top and bottom of the striking face and the top and bottom adjacent the rear of the head. As to claim 7, note col. 4, lines 55, 56.

Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3711

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See Figures 2 and 6 in Le.. Lundberg shows a volume for a hollow club head, of interest. Note the PCCP structure in Miura. See Figure 2 in Nagamoto. Observe Figure 1 in Humphrey. Wood shows a crown structure, of interest. The striking face in Mahaffey shows a laminated structure, of interest. Hutin shows a crown construction, of interest. Aizawa and Shan shows hollow club head structures, of interest.
